NTT keynote: Optimizing your hybrid cloud for business agility

Andy Cocks takes a look at how we're meeting our clients' data centers and hybrid cloud requirements and business objectives, by unlocking benefits such as services and commercial innovation, secured and simplified IT operations. Bringing in our hybrid cloud experts, Andy will also facilitate a discussion highlighting how clients have leveraged our technology and managed services, automation and NTT Services platform integrated with key partners, to deliver on these outcomes.

Duration: 40 minutes

[Andy Cocks, Chief GTM Practices Officer, NTT Ltd.](#)

Regional panel:

[Richard Garratt, Senior Vice President, GTM Practices, NTT Ltd.](#)

Client perspective:

TBC

A hybrid cloud strategy that is Secure by Design

Matthew Gyde explores how an organization can be cybersecurity conscious at all levels of their hybrid cloud strategy - bringing together people, process and technology so that security is built-in, not bolted on. He will talk through our clients' experiences moving toward Secure by Design, and NTT's solutions to enable that transformation.

Duration: 10 minutes

[Matt Gyde, Chief Executive Officer, NTT Security](#)

Hear from our panel of industry experts

Our expert partner panel will give us insight into how they're thinking differently to help clients respond, bounce back, and ultimately transform, leveraging cloud and hybrid infrastructure.

Regional breakout

Application Lifecycle Framework

Businesses are critically dependent upon Enterprise Application to deliver digital transformation and outcome driven operations. As part of that transformation, application delivery and user experience are key – the challenge the businesses are now faced with is how to enhance and optimize customer experience and application delivery with platform selection, operations, security and flexibility at the forefront. Join us to learn an end-to-end application lifecycle approach delivering continuous innovation and development while leveraging a hybrid IT application delivery model. We'll also provide information on the advantages of application modernization utilizing Agile, flexible, high-performing and secure by design full-stack integrated infrastructure and services approach.

[Muna Khurshid, Vice President, GTM, Intelligent Infrastructure, NTT Ltd.](#)

[Murali Subramanian, Practice Director – Cloud and Automation, NTT Ltd.](#)

[Michael Ritchken, Principal Consultant – Cloud Computing Services, NTT Ltd.](#)
